

sinclair's broadcasting decision to FORCE their stations to air an anti-Kerry documentary so close to our national elections is outrageous. Sinclair uses our airwaves free of charge and is obligated by law to serve the public interest. Having large companies control the airwaves is the danger of media consolidation, and bad for Democracy. Need I write this? We need to see local news from our communities about issues that matter to us and different points of view from those which might be held by large companies such as Sinclair. Thank you.
